

VOTE KASIM FOR TALKS COORDINATOR

I'm a first year MMath student, running for
Talks Coordinator

Why vote for me?

I have attended almost all of the maths societies talks this year, so I know what people want to see.

I am good at building a rapport with lecturers, and I am not afraid to ask questions – vital to organising talks.

I am reliable, organised, and proactive.

As a prefect and maths ambassador for my school in year 13, I have experience in running maths related events.

Why am I running?

I am a highly active member of the society, and would like to be more involved in its operations.

The talks this year have been highly enjoyable, and I want to maintain this going into the next academic year.

Further, I intend to go into academia, and believe that this role will help me facilitate both connections and interests that may help both myself and other people in this goal.

What will I do for you?

Ensure that we continue to have talks covering a wide range topics, interests, and research areas.

Ensure talks do not clash with any core or optional core maths modules, so all maths students can attend.

Provide MORE FREE PIZZA each week.

Promote Talks well in advance on all society platforms so the information is easy to find.

Organise WIMP efficiently, and ensure the event runs smoothly.

Include free tea/coffee at the start of WIMP, so that all participants can wake up for the talks
