

ZAIN LAM

Careers Officer

About Me

- **1st year maths student**
- **Currently a fresher rep**, I've helped out with the Coffee and Cake events, organising WIMP and posting on the WMS insta page.
- **I play cello and piano** and (somehow) have a music scholarship from WAC.
- I'm also a **fresher rep in QuantSoc**.
- I think I spend more time in the library than at my own accommodation.
- If I'm not spending time on maths, I'm probably earning money (playing poker).

My Aims

- Set up a **student ambassador scheme** with the **Institute of Mathematics and its Applications**.
- **Be proactive in inviting firms and companies to do talks**, and have career opportunities from a **wider range of fields**.
- **Make use of the IMA mentorship scheme** to help advise about how maths can be used in industry.

$$d = \sqrt{(x_2 - x_1)^2 + (y_2 - y_1)^2}$$

Why Me?

- **I have experience with helping others be aware of opportunities:** at my previous school I advocated within the maths department to spread awareness about maths competitions and was a student representative at open days.
- **I am well connected with next year's exec in many societies** like Stats Soc, Quant Soc, Finance Soc, Consulting Soc etc, so there are many opportunities for joint events.

Job interviewer: It says in your CV that you are quick at mathematics.

What is 17×19 ?

Me: 36

Interviewer: That's not even close

Me: But it was quick
