

ZAIN LAM

Treasurer

About Me

- 1st year maths student
- Currently a fresher rep, I've helped out with the Coffee and Cake events, organising WIMP and posting on the WMS insta page.
- I play cello and piano and (somehow) have a music scholarship from WAC.
- I'm also a fresher rep in QuantSoc.
- I think I spend more time in the library than at my own accommodation.
- If I'm not spending time on maths, I'm probably earning money (playing poker).

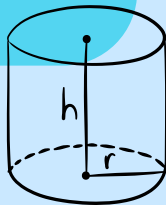

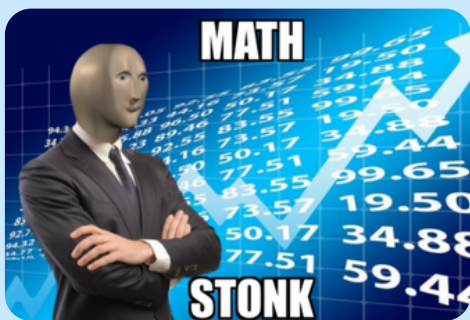

$$V = \frac{4}{3} \pi r^3$$

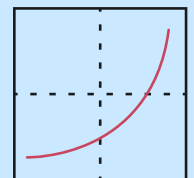

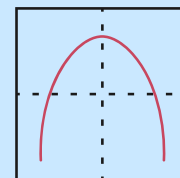

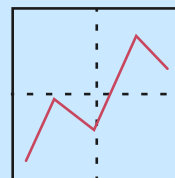

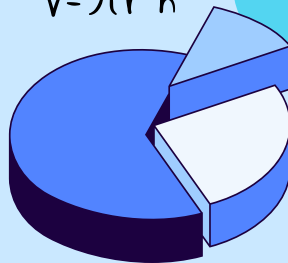

My Aims

- Collaborate with other societies to have fundraising events.
- Reach out to a wider variety of companies and firms for grants and sponsorships, such as law, consulting and tech firms.
- Start the process of contacting sponsors over Summer so that we can secure funding for next year,
- so they can be added to our banner and be on the website during welcome week.
- Maintain our finances so that we can host our events to at least the same quality as this year.

$$V = \pi r^2 h$$

Why Me?

- I have experience with finding sponsorships: when I organised a charity concert to fundraise money I initially needed to find sponsors so I could rent out the venue. (£500 from the sponsor, and £700 raised for charity)
- Worked with the current treasurer, so I know what improvements can be made to best help the society next year.
